NAME INDEX

Agresti, Alan, 86, 87, 88, 101, 188, 199, 202, 207, 209, 217, 218
Ajzen, I., 50
Albert, Alain, 68
Alexander, Jeffrey C., 46, 47
Allen, Michael Patrick, 254
Altmann, Michael, 285
Amar, Reuven, 115
Anderson, Carolyn J., 256, 258
Anderson, T. W., 92
Andrade, Laura, 102
Andrich, David, 134
Archer, M., 45

Bagozzi, Richard P., 49
Bailey, Norman T. J., 283, 285
Batholomew, D. J., 283, 285
Bearden, James, 254
Benzécri, J. P., 148, 150
Bergsma, W. P., 199, 206, 207, 217, 218
Berkowitz, Stephen D., 255
Bernard, H. Russell, 255
Berry, K. J., 87
Besag, Julian, 104
Birch, M. W., 88
Birkhoff, Garrett, 120, 121, 140, 141
Birnbaum, Allan, 135
Boes, D. C., 154
Bogardus, E. S., 124
Bohrnstedt, George, 99
Boik, R. J., 165, 182
Bonacich, Phillip, 254, 268
Borgatti, Stephen P., 255
Box, G. E. P., 106, 309
Breekler, S. J., 49
Breiger, Ronald L., 128, 254, 255, 266, 269, 277
Brenan, R., 5
Breslow, N., 21, 34
Brooks-Gunn, Jeanne, 10
Brower, S., 11
Brown, M. B., 197, 206
Bryk, A., 21
Bunge, Mario, 73
Burt, Ronald S., 303, 304
Buskens, Vincent, 296, 308

Callon, M., 45
Carley, Kathleen M., 48, 51
Carrol, G. R., 48
Carter, Woody, 14
Chattoe, Edmund, 68
Christoffersson, Anders, 82, 106
Chuang, C., 188, 202, 218
Cicourel, A., 45
Clayton, D. G., 21, 34
Clifford, Peter, 104
Clogg, Clifford C., 84, 127, 135, 148, 188, 189, 193, 206, 212
Cochran, William G., 87, 88, 89

Cohen, M. D., 48
Collins, Linda M., 87, 104, 105
Collins, Randall, 44, 45, 48
Conte, Rosaria, 44, 48
Converse, P., 50
Cook, T., 10
Couclelsis, H., 51
Coull, B. A., 188, 202, 209
Covington, J., 11
Cox, Christopher, 88
Cox, D. R., 309
Cramer, Harald, 87
Crespi, I., 50
Cressie, Noel A. C., 87, 92
Cronbach, L., 5, 12
Croon, M. A., 188, 198, 208, 215
Crouch, Bradley, 256, 264

Dahl, Robert A., 56
Dahlbäck, Olof, 241
Davis, A., 254, 255, 270, 271, 273, 274, 275, 276, 277
Davis, James A., 226
De Boeck, Paul, 115
de Leeuw, J., 148, 149, 150, 152, 153
Dempster, Arthur P., 84, 106, 208
Diamond, I., 219
Diekmann, Andreas, 285
DiPrete, Thomas A., 43
Doran, Jim, 48
Doreian, Patrick, 254
Dryman, Amy, 98
Duncan, Greg, 7, 8
Duncan, Otis D., 130, 134
Duquenne, Vincent, 115
Dykstra, R. L., 188, 199, 201, 207, 208, 209, 210

Earls, F., 7, 31
Eaton, William W., 97, 98, 99
Efron, Bradley, 104
Eliason, Scott, 127, 206
Elizur, Dov, 115
Elliot, Amanda, 10
Elliot, Delbert, 10
Elliot, Euel, 68
Ellner, Stephen P., 285
Evans, M., 188, 198, 218
Everett, Martin G., 255

Fahrmeir, L., 207
Fararo, T. J., 264
Faust, Katherine, 226, 231, 234, 239, 255, 256, 264, 270, 294
Feld, Scott L., 254
Fershtman, Meir, 230
Fidler, P. L., 87
Fienberg, S. E., 154
Finer, Samuel Edward, 54, 59
Fischer, G. H., 134
Fishbein, M., 50
Fisher, Ronald A., 87
Flache, Andreas, 48
Forristal, Jerry D., 43
Frank, Ove, 227, 258, 260, 261, 263, 265, 267
Freeman, Linton C., 115, 254, 255, 283, 299
Freeman, M. F., 92
Freeman, Sue C., 255
Friedkin, Noah E., 282, 283, 286, 287, 299, 318, 322

Galaskiewicz, Joseph, 256, 269, 271, 273, 274, 275, 276, 277
Gardner, B., 254, 255, 270, 271, 273, 274, 275, 276, 277
Gardner, M. R., 254, 255, 270, 271, 273, 274, 275, 276, 277
Gibbons, Jean D., 237
Gibbons, Robert D., 22, 34
Giddens, A., 45
Giesen, Bernard, 46, 47
Gifi, A., 148, 150, 157, 161
Gilbert, Nigel, 44, 48, 73
Gill, P. E., 203

Gilula, Z., 148, 149, 151, 152, 158, 184, 188, 202, 209, 210
Goldstein, Harvey, 34
Goodman, Leo A., 84, 87, 99, 116, 125, 126, 128, 148, 149, 150, 151, 152, 156, 157, 158, 188, 193

SUBJECT INDEX

actor overlap
  affiliation networks, 268–77
affiliation networks
  logit models, 253–80
algebraic representations of beliefs and attitudes
  item response modeling, 113–46

Bayes factors
  latent class models, assessing, 105, 106
belief precedence, 115–23
Bernoulli transitive triple model, 238–40, 250
  powers of tests against transitivity, 240, 241
bivariate case
  LCM, 151, 152
  parametric and nonparametric models, 189–95, 210, 211
  simple CA, 149–51
bootstrapping, 104, 105

classroom sociograms
  transitivity in digraphs, 241–8
conditional uniform model
  transitivity in digraphs, 231, 232, 249
constructural model
  master equation approach, compared, 51–3
contagion model
  information diffusion (in heterogeneous social networks), 281–325
convergent and divergent validity, 30–2
correspondence analysis (CA), 147–86
coup theory
  micro-macro link, 53–72
covariance matrix
  for unstandardized residuals, 88–92

dependent dyad choice models
  affiliation networks, 260, 261
depression and phobias
  latent class model, 97–102
  symptom variables, definitions, 107
digraphs
  testing transitivity in, 225–51
dual networks
  logit models, 253–80
dyadic diffusion time
  information diffusion (in heterogeneous social networks), 302, 304–6, 311–15

ecometrics, 1–41
EM algorithm for models with inequality restraints, 220
emergent phenomena, 73, 74
empty balance algorithm
  master equation, as, 50

equality restrictions on probabilities
  inequality restrictions. *See* inequality restrictions on (conditional) probabilities
  linear, 195–7
  log-linear, 199–201
event overlap
  affiliation networks, 268, 269, 271–7

face-block reliability, 23
factor analysis, 5
  with item response modeling and generalizability theory, 32, 33

generalizability theory, 5
  with item response modeling and factor analysis, 32, 33
global diffusion time
  information diffusion (in heterogeneous social networks), 305–7, 309–11
goodness-of-fit test
  latent class models, 81–111
Guttman scaling, 114–17

higher order marginals, 104
hypernetworks
  logit models, 253–80

immediate effects centrality
  information diffusion (in heterogeneous social networks), 283, 287
independent dyad choice models
  two-mode networks, 256–8
individual diffusion time/measures
  information diffusion (in heterogeneous social networks), 304–7, 315–19
individual interactions
  direct, continuous attitudes, 51
  direct, discrete attitudes, 51
  indirect, continuous attitudes, 51, 50
  indirect, discrete attitudes, 50
inequality restrictions on (conditional) probabilities
  EM algorithm for models with inequality restraints, 220
  linear, 188, 198, 199
  logit regression models, 212
  log-linear, 188, 201, 202
  optimization under inequality restraints, 218, 219
information diffusion
  heterogeneous social networks, 281–325
interscale correlation, 24
intra-NC correlations, 21, 22
item response modeling, 4
  algebraic representations of beliefs and attitudes, 113–46
  with factor analysis and generalizability theory, 32, 33
  representation of responses associated with beliefs, 134, 135

joint correspondence analysis (JCA), 149, 164–6
  relation to LCA and MCA, 166–84

LaGrange function, 218
latent class analysis (LCA), 147–86
latent class models, 83, 84
  belief structure, lattice approach, 123–7
  bivariate case, 151–60
  goodness-of-fit test, 81–111
  log-linear, 84–6
  for ordinal items, 214–17
latent class transition models, 104
latent variables, 148
  maximum-likelihood estimation, 207, 208
lattices and posets, 120–3
  theorems on, 139–44
linear equality restrictions on (conditional) probabilities, 195–7
linear inequality restrictions on (conditional) probabilities, 188, 198, 199
logit models
  affiliation networks, 253–80

for ordinal variables, 212
log-linear
affiliation networks, 258, 259
equality restrictions on (conditional) probabilities, 199–201
inequality restrictions on (conditional) probabilities, 188, 201, 202
latent class model, 84–6
longitudinal data
marginal models for partially missing data, 213, 214

manifest variables, 148
marginal models
for partially missing longitudinal data, 213, 214
Markov chain model
information diffusion (in heterogeneous social networks), 282, 287–94
Markov graph model
affiliation networks, 261, 262, 267, 268, 277
master equation, 48–53
advantages, 72–4
compared with other formal models of attitude formation, 50, 51
compared with sociological notions of other formalized multilevel models, 51–3
military coups, 53–72
maximum-likelihood estimation, 203–9
affiliation networks, 263, 264
mean contagion time (MCT)
information diffusion (in heterogeneous social networks), 286, 287, 289, 290
mean first passage time (MFPT)
information diffusion (in heterogeneous social networks), 286, 287, 289, 290
mean local transitivity density
superiority of transitivity test based on, 248
mediative effects centrality
information diffusion (in heterogeneous social networks), 283
membership networks
logit models, 253–80
mental health and socioeconomic status
CA and LCA, 155–60
Metropolitan Networks
transitivity tests, 241–8
micro-macro link
simulating, 43–79
military coups
micro-macro link, 53–72
Monte Carlo simulation, 92–7, 104, 105
multiple correspondence analysis (MCA), 149, 161–4
relation to JCA and LCA, 166–84

NC-level reliabilities, 22, 23, 35–8
neighborhood ecometrics, 1–41
nonparametric models
ordinal categorical data, 187–223
notation in transitivity tests, 229, 230
null distribution
transitivity in digraphs, 235–8

observation-based assessments, 10–33
optimal scaling, 148
optimization under inequality restraints, 218, 219
ordinal categorical data
nonparametric models, 187–223

p^* models
affiliation networks, 262, 263, 266, 273–7
Pearon statistic, 92
phobias and depression
latent class model, 97–102
symptom variables, definitions, 107
posets and lattices, 120–3
theorems on, 139–44
Power Divergence (PD) statistic, 92
PQL estimation, 21, 34, 35
Project Metropolitan
transitivity tests, 241–8

proportion of transitive triples
transitivity in digraphs, 232–5
pseudo-likelihood estimation
affiliation networks, 263, 264, 270
psychometric to ecometric standards, 3–41

residuals, 88, 89
second-order marginals. *See* second-order marginals

scaling
Guttman scaling, 114–17
optimal scaling, 148
second-order marginals, 89–92
depression and phobias, 97–102
utility in testing latent class models, 103, 104
self-organization theories
contribution to micro-macro link, 48, 49
simple CA
bivariate case, 149–60
social networks
information diffusion (in heterogeneous social networks), 281–325
logit models for affiliation networks, 253–80
socio-configuration, 49
socioeconomic and mental health status
CA and LCA, 155–60
sparseness
bootstrapping and Monte Carlo sampling, 104, 105
goodness-of-fit tests, 86–8
survey-based measures
algebraic representations of survey responses, 130–8
assessing, 6–10
systematic social observation, 10–33

Thailand, military intervention in
micro-macro link, 59–72
time-of-day effects, 27, 37
transition probability, 49
transitivity in diagraphs
testing, 225–51
trend configuration, 50
triad models
affiliation networks, 264–6

uncertainty model and results
systematic social observation, 16–32
unidimensionality, 115
utility functions, 49, 50

variance-covariance components
physical disorders, 27, 28, 37
social disorder, 29

welfare programs and recipients
white American beliefs, 127–34
